About Us

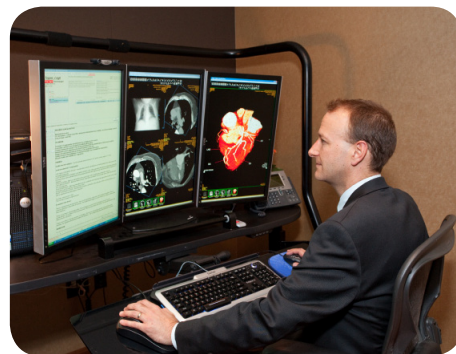

Virtual Radiologic Corporation (vRad) is a national radiology practice working in partnership with local radiologists and hospitals to optimize radiology's pivotal role in patient care. vRad's more than 140 radiologists serve 1,200+ facilities (21% of U.S. hospitals), reading 2.7 million studies annually. Delivering access to extensive subspecialty coverage, vRad contributes to improved quality of patient care. And with its next-generation technology, vRad enhances productivity, helping to lower the overall cost of care while expediting time to diagnosis and treatment.

Recent Recognitions

- Number-one ranking in the Teleradiology Services Category in the 2009 Top 20 *Best in KLAS Awards: Software & Professional Services report* for second consecutive year. www.KLASresearch.com
- Stevie® Award for Best Use of Technology in Customer Service for entry titled "Virtual Radiologic Utilizes Innovative Technology to Deliver Real-Time Customer Service."
- Issued first patent by the U.S. Patent and Trademark Office for workflow application technology, including rules-based order assignment technology, order forecasting and radiologist scheduling applications.

Interpretations Solutions

- vRad radiologists read 2.7 million preliminary and final studies annually. Of the total volume 750,000 are final interpretations (32% of volume).
- vRad has had a market-leading quality assurance program since 2004.
- vRad is one of the few virtual radiology providers to offer a peer review program. Our program relieves the administrative burden of performing peer review to meet accreditation standards and internal and external demand for quality data.

Next-generation Technology Solutions

A leader in technology development for virtual radiology, vRad offers a suite of technology solutions to increase productivity without capital investment.

- vRad® Enterprise ConnectSM, unify radiology operations and technologies into a single enterprise-wide system.
- vRad® PACSSM, our proprietary PACS designed to promote efficiency.
- vRad® VaultSM, an image storage solution.
- vRad® ResultsSM for mobile and Internet access to images, reports and instant communication link to radiologists. Pushes alerts of critical findings and completed reports to ordering physicians via Apple® iPhone® or iPad™ mobile digital devices.
