

Get Fast Radiology Results Direct to Mobile Devices

vRad® RESULTSSM

Physicians need fast radiology results so they can provide precise, timely patient care. When they have questions about radiology reports, they want easy access to reading radiologists and key images. The demands in today's healthcare environment do not allow for delays of this critical information.

The waiting and searching are over. Enter vRad® ResultsSM.

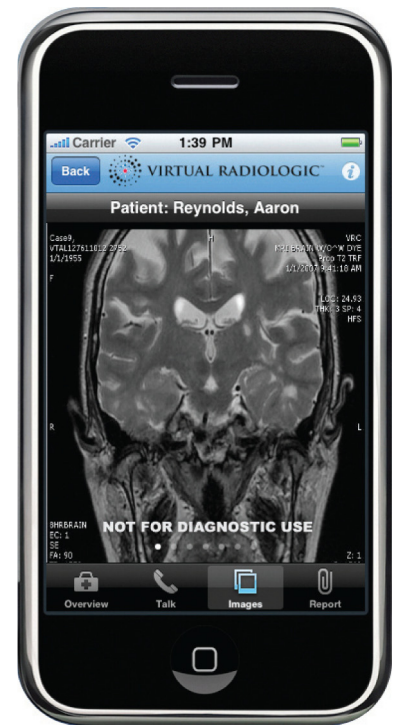

This cloud communication tool, hosted and managed via the Internet, provides secure mobile and Internet access to images, reports, and local and vRad radiologists to improve communication and ultimately patient care. vRad Results makes time-sensitive radiology results accessible to the entire patient care team at any time, via the Internet and Apple® iPhone® or iPad™ mobile digital devices.

Improved patient care, increased productivity: With vRad Results, ordering physicians receive completed reports, findings and key, non diagnostic images directly on their iPhone or iPad—the moment the data is available. Should the ordering physician need to talk to the local or vRad radiologist, a single click is all that's required.

When members of the patient care team need to review full DICOM image sets and reports, they can access them securely via the Internet. With a single click, they can initiate a consultation with the local or vRad radiologist.

Reliability and compliance: vRad Results includes time-stamped communications and other technologies to support your organization's efforts to meet Joint Commission National Patient Safety Goals and other initiatives.

- Critical finding reporting to document and report on communication response times
- "Break-the-glass" authorization (temporary emergency access to patient information for authorized practitioners who otherwise lack access rights)
- Information-access reporting

VIRTUAL RADIOLOGIC®

What is cloud computing?

- Broadly speaking, any Internet-based service or technology solution
- Can eliminate local capital expenditures and maintenance fees
- Lower risk, pay-as-you-go model
- Nearly unlimited capacity

Sign of the future? Microsoft is “betting our company” on the cloud. –Steve Ballmer, Microsoft CEO, March 4, 2010

Cost savings: Eliminate costly workstations for non-radiologists and the associated annual service fees. With vRad Results, the entire patient care team can access the information they need via any computer with this Internet-based tool and have it available for use with patients during treatment discussions.

It works for us; let it work for you: In our own national practice, vRad efficiently manages, reads and stores more than 2.7 million studies annually with industry-leading efficiency and accuracy rates. Clients can now use vRad Results and many other vRad technologies to increase productivity, enhance patient care and reduce expenses.

vRad Results allows you to improve the effectiveness of communications and ultimately patient care by streamlining the delivery of radiology results for the entire patient care team.

When you make the decision to implement vRad Results, our customer support team will ensure a seamless integration into your radiology operations. As a vRad client you get unparalleled live client service and technical assistance 24/7/365.

What are you waiting for? Contact vRad today at [800.737.0610](tel:800.737.0610) to solve your challenges related to physician notification and communication that affect timely patient care.
